

A-Tube Nano Swing,
Design by Studio Italia Design

Model A-Tube Nano small

A-Tube Nano expresses light in its purest form, featuring a suspension lamp that draws a fine line of light through space. The ultra-light aluminum structure, with a slim diameter of just 2 cm, holds a transparent methacrylate diffuser at its lower end, with an internal LED module that emits a soft, enveloping glow. Available in three frame lengths and six versatile finishes, A-Tube Nano offers inspiring possibilities for composition – whether as a single light point or clustered in groups to create unique lighting arrangements, suited to various settings and moods, both in residential, contract, and hospitality spaces. In the new recessed version, the lamp is installed directly onto the ceiling and can be adjusted to direct light precisely where needed, enhancing the dramatic effect of multi-element compositions.
