Model Tidal Adjustable

Created in collaboration with Needs Studio, Tidal is an elegant collection of lamps with exceptional luminous efficiency. Their fluid and impactful design captures the essence of the movements of celestial bodies, waves, and tides. The lamps appear different depending on how they are viewed from below, thanks to the rings' irregular, asymmetrical shape, with one side wider than the other. Available in two configurations – ceiling-mounted and pendant – Tidal integrates seamlessly into diverse settings, from residential to professional environments and even contract projects. It offers lighting solutions that illuminate and decorate, whether used individually or in repetition, while exploring the interplay of the collection's various configurations and dimensions.
